

Introducing CSAAC "Marvel Mats"!

As part of their occupational therapy and pre-vocational skills services at CSAAC's **Community School of Maryland**, many of our students are now making these colorful, sturdy door mats - and selling them to produce extra funds for various programs at our school.

These 16" x 22" mats are made from heavy flexible vinyl links, wired together in a wide range of patterns and colors. They are long-lasting, weather-proof and nearly indestructible. The open design allows water and snow to drain through, leaving a textured surface for wiping off shoes.

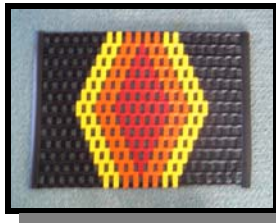

**Great Gift
Idea!**
